## Introduce new purchase power from new tracks

A global commerce and trade showcase platform exhibition that spans the whole packaging industrial chain and integrates series packaging exhibitions in 6 major sectors, WEPACK encompasses products, technologies and services involved in the complete packaging industrial chain from upstream to downstream, including raw paper & raw materials, packaging processing equipment, the course of packaging processing, and finished packaging products. Leveraging resources accumulated over the past 20-odd years, through the globalization scale effects and industrial layout, it "connects and drives" the development of the global packaging industry, while creating significant value that promotes upstream and downstream "symbiosis" in the industrial chain. Furthermore, it helps every packaging supplier in the industrial chain break traditional patterns, make breakthroughs amid competition, gain access to new markets, resources, and tracks, and move towards a new development ecosystem that is more sustainable.

## WEPACK 2024 series packaging exhibitions
